PROFESSIONAL SUMMARY

PHP Developer with 1.3+ years of experience building and maintaining PHP/CodeIgniter 3 and 4 web applications, including e-commerce and CRM systems, using MySQL, MVC architecture, REST API and third-party integrations, authentication, CRUD modules, and payment gateways. Independently built and deployed **BSSSHOP**, a full-stack e-commerce application originally developed with CodeIgniter and re-implemented with **Laravel + React**, using Docker, Git/GitHub, and Render deployment.

TECHNICAL SKILLS

Backend: PHP, Laravel, CodeIgniter 3, CodeIgniter 4, MVC, REST API Development, CRUD, Authentication, Session Management, Server-side Validation

Database: MySQL, SQL, Relational Data Modeling, Joins, Aggregations, Query Optimization

Frontend: React, JavaScript, jQuery, AJAX, HTML5, CSS3, Bootstrap

E-commerce & Payments: Razorpay, Mollie, Payment Gateway Integration, Cart, Checkout, Order Management

Tools & Deployment: Git, GitHub, Docker, Render, XAMPP, FileZilla, REST API Testing

Other: Redis Caching, DataTables, Excel Import/Export, PDF Generation, Email Notifications, Third-party API Integration, JSON

PROFESSIONAL EXPERIENCE

PHP Developer / CodeIgniter Developer — Bugtreat Technologies

Apr 2025 – Jul 2026

Project: Phonefurb – E-commerce CMS Platform

- Developed and maintained e-commerce modules in PHP and CodeIgniter, including product listings, product details, cart, checkout, and order workflows.
- Integrated the Mollie payment gateway to support online payments and checkout completion.
- Implemented automated PDF invoice generation after successful orders, with customer order-detail views and invoice downloads.
- Built admin dashboard features for manual invoice creation and product management.
- Maintained content modules including Contact, FAQ, and About Us pages.

Project: Serku CRM – CRM Web Application (RISE CRM)

- Implemented lead-management workflows covering lead creation, conversion to estimates, and task/event creation per lead.
- Streamlined team-based assignment of leads and tasks across team members.
- Integrated the Scaleware REST API with RISE CRM for project synchronization and document management.
- Added email notifications and PDF generation for CRM documents.
- Implemented Redis caching and persistent filters to improve usability and performance.
- Automated configurable Excel import/export and notification features across CRM modules.

PROJECTS

BSSSHOP — Independent Full-Stack E-commerce Project

Current Stack: Laravel, PHP, React, MySQL, REST APIs, Docker, Razorpay, Git/GitHub, Render

- Built and deployed a full-stack e-commerce platform with a Laravel REST API backend and React frontend, covering the customer storefront and admin management.
- Modernized the original CodeIgniter implementation into a Laravel + React architecture while retaining core e-commerce functionality.

- Developed product catalog, category browsing, filtering, variants, cart, wishlist, checkout, and order-management workflows.
- Implemented customer registration, login, authentication, session handling, protected API access, and role-based admin access.
- Integrated Razorpay payments with payment verification, automated invoice generation, and stock and order processing.
- Built admin modules for products, categories, orders, customers, blog, FAQ, contact, and application settings.
- Created REST API endpoints for authentication, products, cart, wishlist, checkout, orders, and admin operations, and integrated them with a responsive React UI.
- Containerized the application with Docker (MySQL service) and deployed it on Render with production environment configuration and persistent storage handling.
