PROFESSIONAL EXPERIENCE

PHP Developer / CodeIgniter Developer — Bugtreat Technologies | Apr 2025 – Jul 2026

Project: Phonefurb – E-commerce CMS Platform

- Developed and maintained customer-facing e-commerce modules, including homepage, product listings, product details, cart, and checkout workflows.
- Integrated the Mollie payment gateway to enable secure online payment processing and checkout completion.
- Built automated PDF invoice generation triggered on successful orders, including customer order-detail views and invoice downloads.
- Developed admin dashboard functionality for manual invoice creation and product management.
- Maintained supporting content modules, including Contact, FAQ, and About Us pages.

Project: Serku CRM – CRM Web Application (RISE CRM)

- Implemented lead-management workflows covering lead creation, conversion to estimates, and task/event creation per lead.
- Streamlined team-based assignment of leads and tasks across team members.
- Added email notification and PDF-generation capabilities for CRM documents.
- Integrated the Scaleware REST API with RISE CRM for project synchronization and document management, and implemented Redis caching to improve performance.
- Enhanced usability by adding persistent filters to leads and estimates listing pages.
- Automated dynamic Excel import/export with configurable formatting and deployed notification functionality across CRM modules.

PROJECTS

BSSSHOP Independent Project

PHP, CodeIgniter 4, MySQL, HTML, CSS, JavaScript, jQuery, Bootstrap

- Built a full-stack e-commerce platform using CodeIgniter 4 MVC, PHP, and MySQL, with separate customer-facing and admin experiences.
- Developed product catalog, category browsing, product filtering, product specifications, cart, checkout, and order confirmation workflows.
- Implemented customer registration, login, and authentication/session management for secure account access.
- Integrated Razorpay payment processing and built a payment configuration area supporting Razorpay, Mollie, and Stripe API keys.
- Built admin modules for products, categories, orders, customers, and content, including blog, FAQ, and contact management.
- Added centralized settings management for payment configuration, language, theme, and timezone options.
- Implemented responsive front-end pages using Bootstrap with JavaScript/jQuery interactions.
- Deployed the project for live demonstration. [BSSSHOP](#)
